

Multiple Filters Chart Gadget

Combine multiple filters into a single chart

5 Types of Data Visualisation

- Bar Chart
- Line Chart
- Pie Chart
- Counter Board
- Data Table

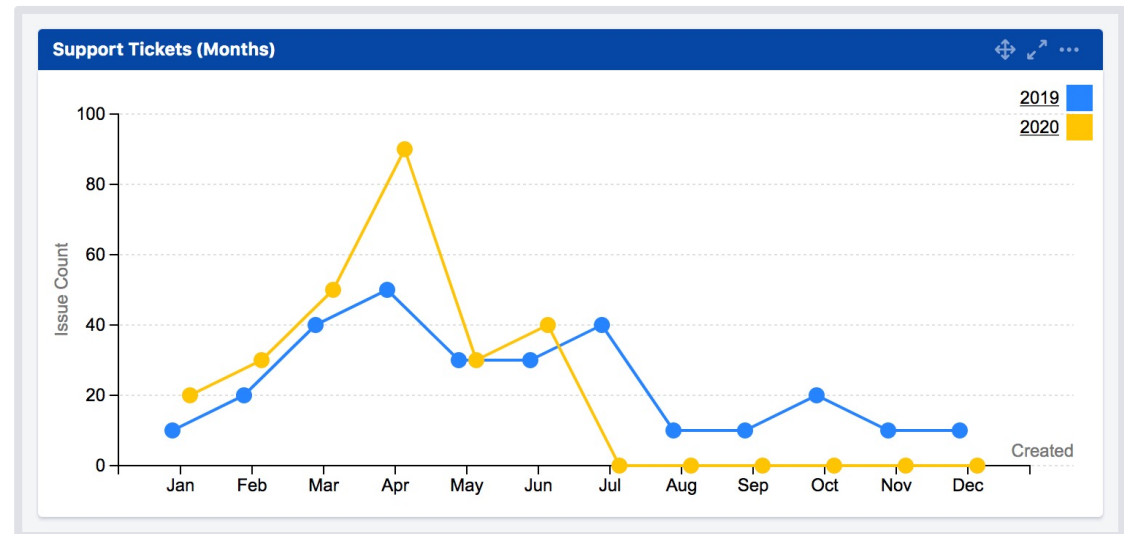

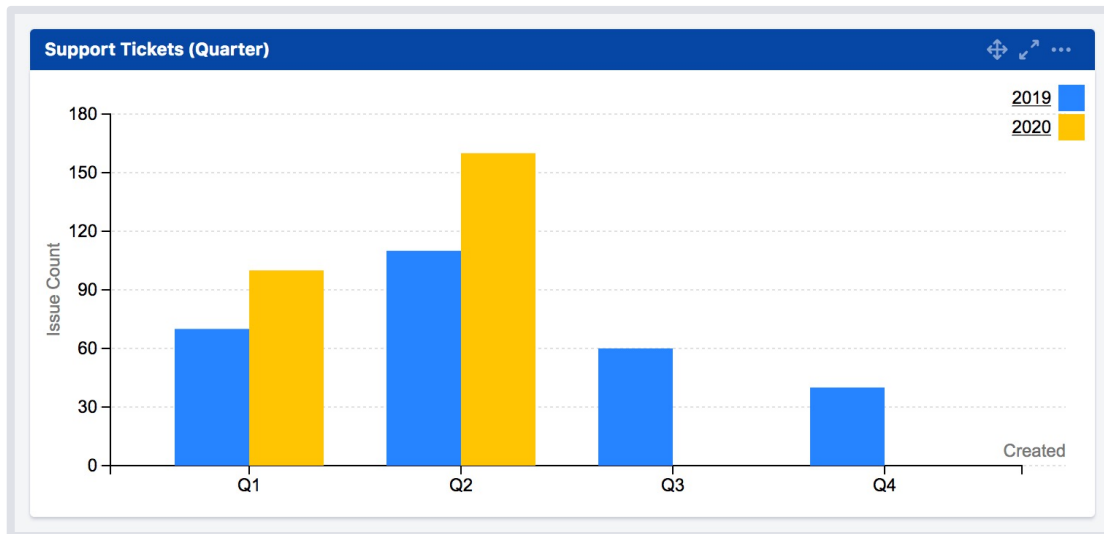

Use Case #1

Q I want to view a year-on-year comparison for support tickets created

A [Multiple Filters Bar Chart Gadget](#), [Multiple Filters Line Chart Gadget](#)

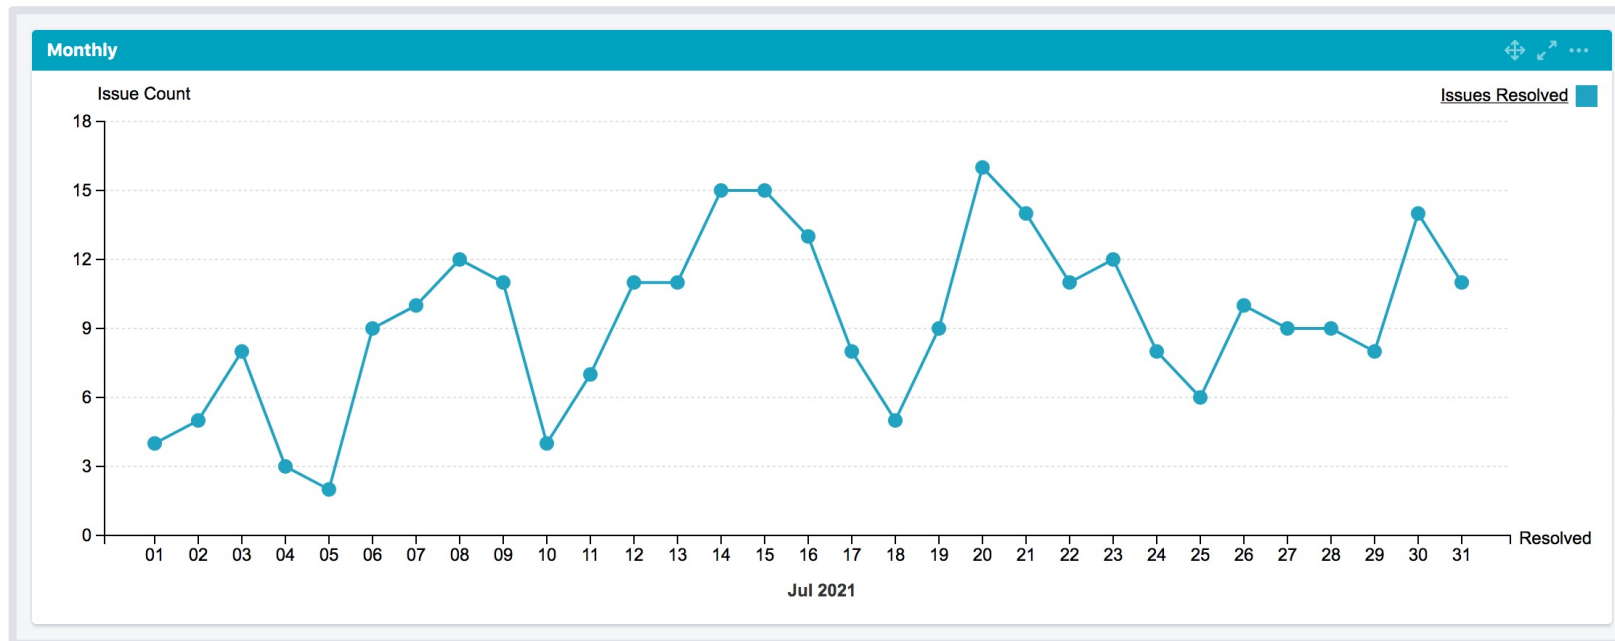

Tip: You can change the **Period Format** and **Months in Groups** to group issues in months, quarters or halves

Use Case #2

Q I want to view a report for all the days in the month

A [Multiple Filters Line Chart Gadget \(Monthly\)](#)

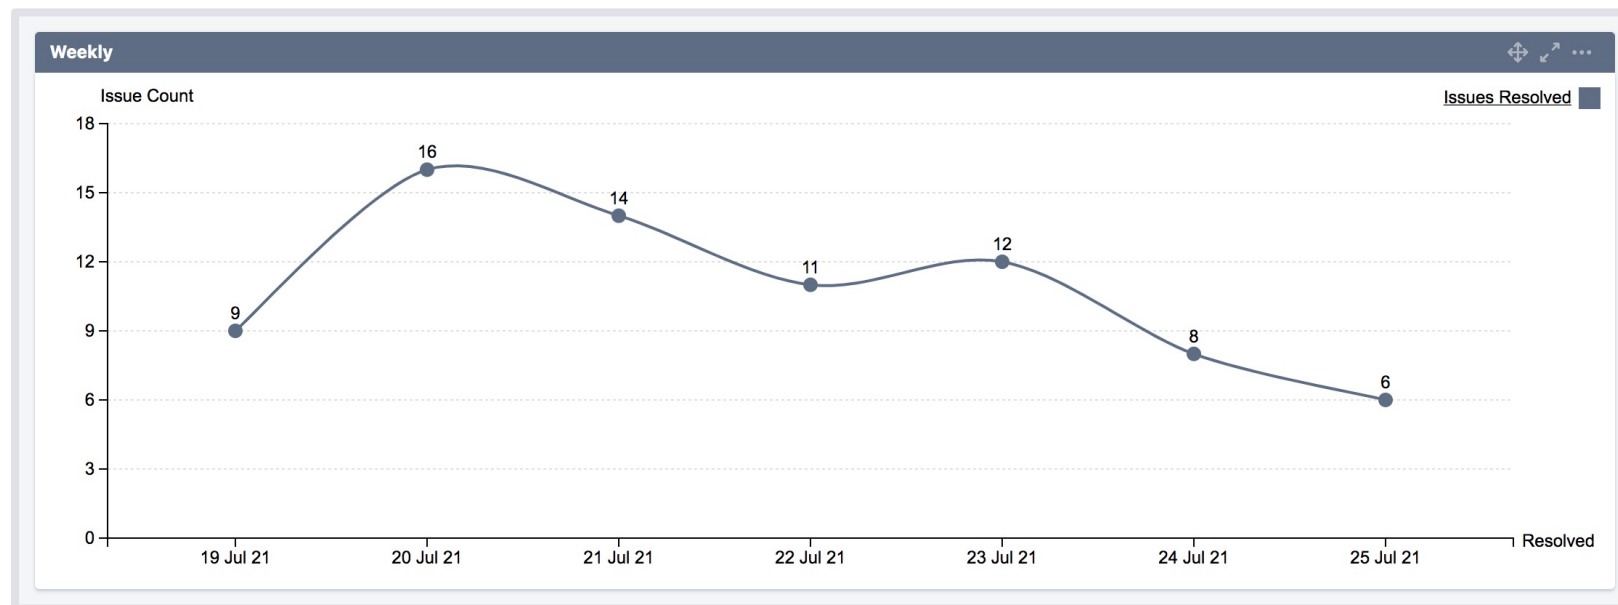

Tip: You can view the current/previous month automatically

Use Case #3

Q I want to view a report for all the days in the week

A [Multiple Filters Line Chart Gadget \(Weekly\)](#)

Tip: You can change the **First Day of Week** (e.g. your weekly sprint starts on a Wednesday)

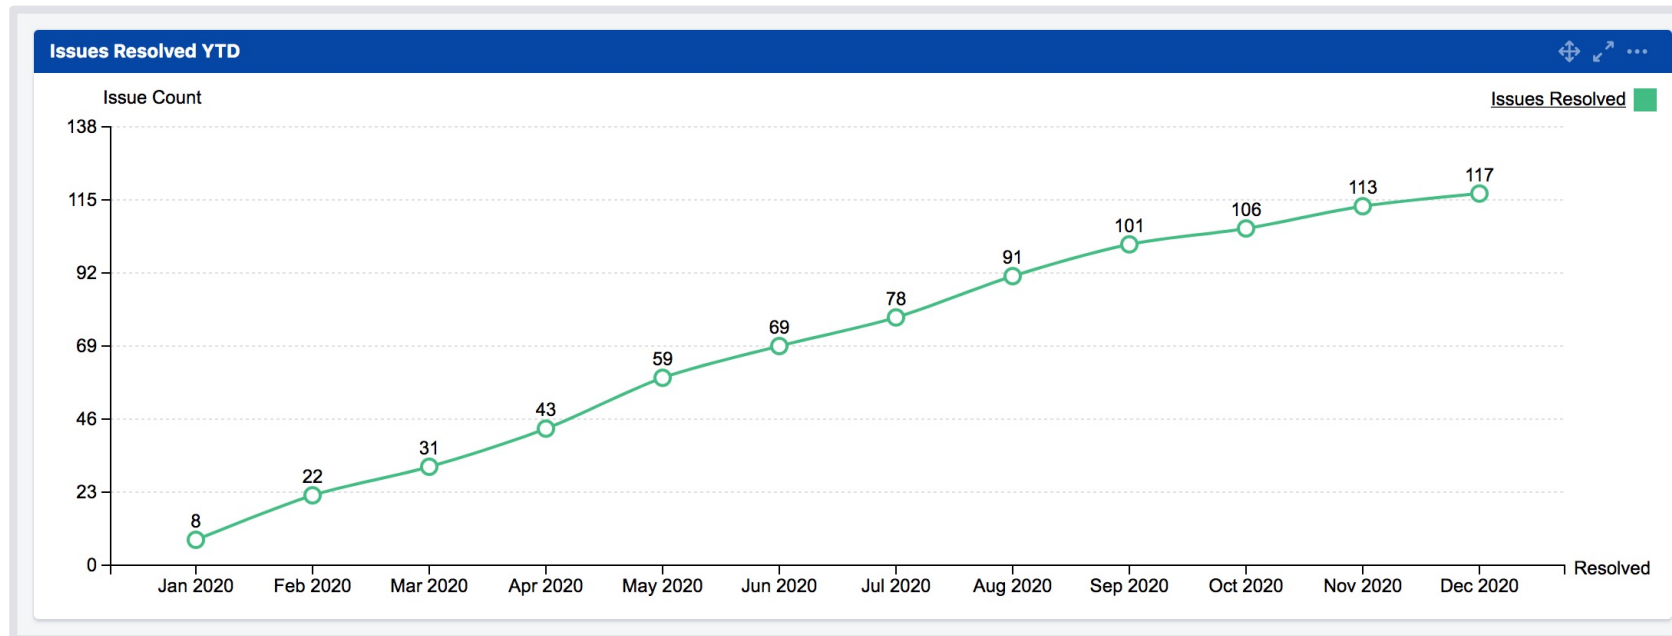

Use Case #4

I want to see the total number of issues resolved year-to-date (YTD)

[Multiple Filters Line Chart Gadget](#)

Tip:

You can also choose to chart the **cumulative** sum of Story Points as a Burnup Chart

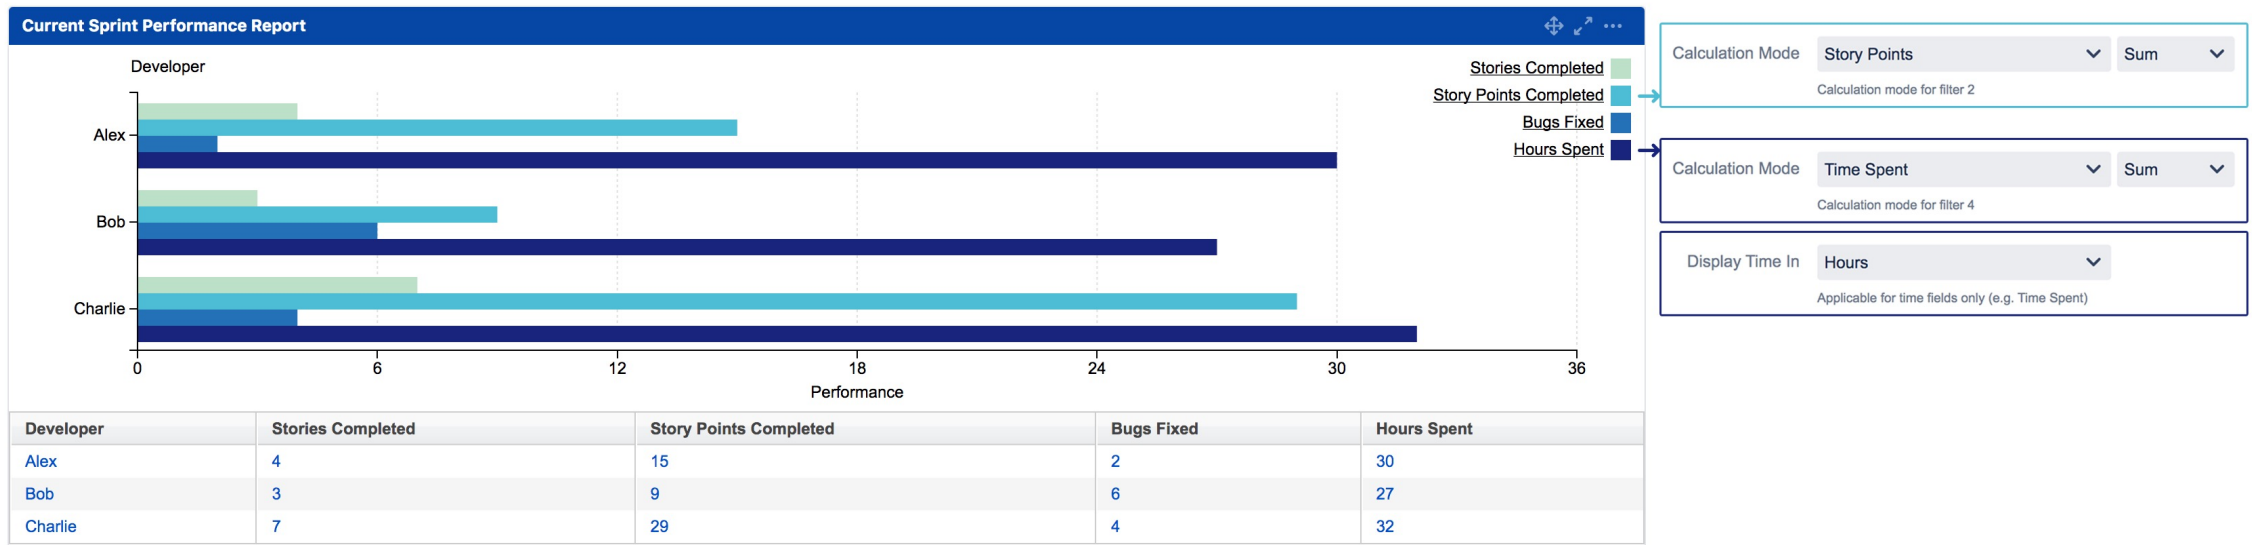

Use Case #5

As a project manager, I want to view the performance of each developer in the current sprint

[Multiple Filters Statistic Bar Chart Gadget \(Horizontal\)](#)

Tip:

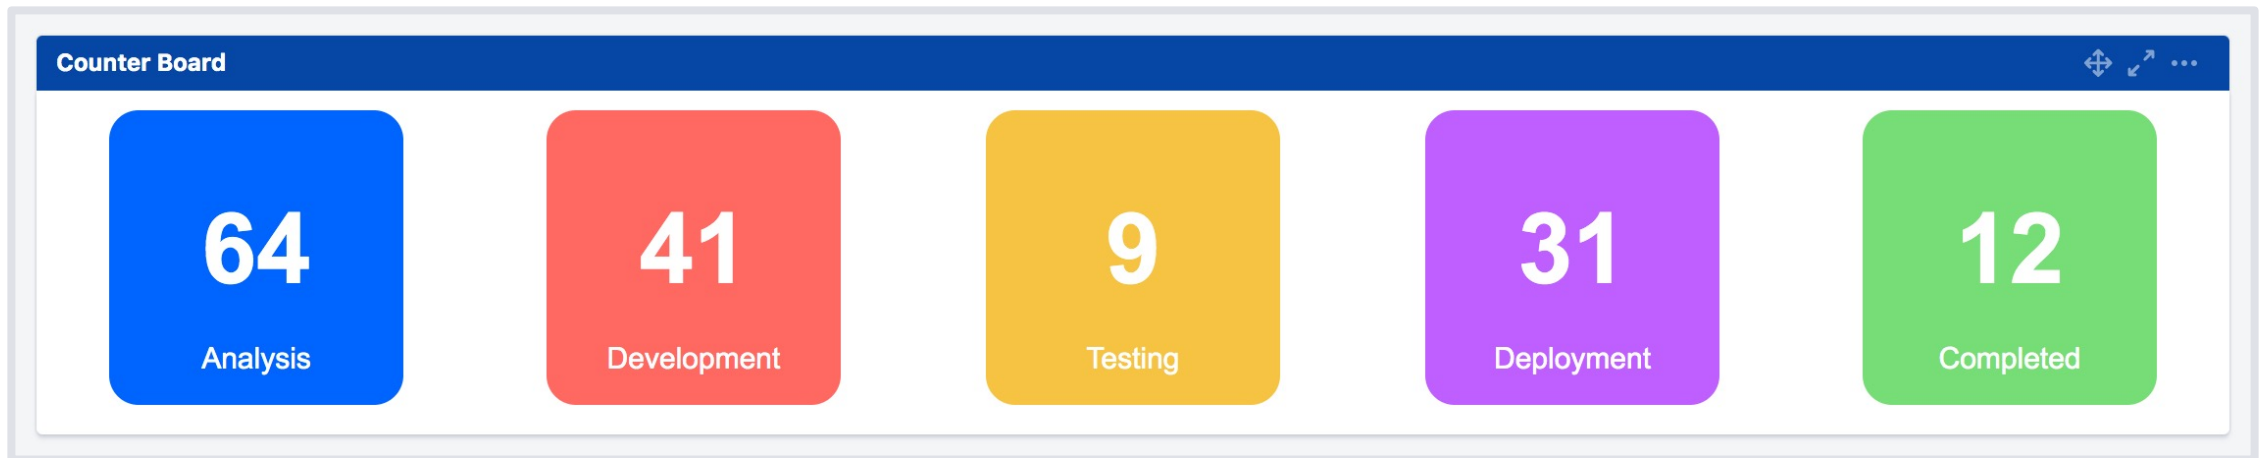

You can track **different types of metrics** (issue count, story points, time or numeric custom fields) using separate filters

Use Case #6

Q I want to track multiple metrics within a single gadget

A [Multiple Filters Counter Gadget](#)

Tip: It is also possible to [set the background colour automatically based on the value](#)

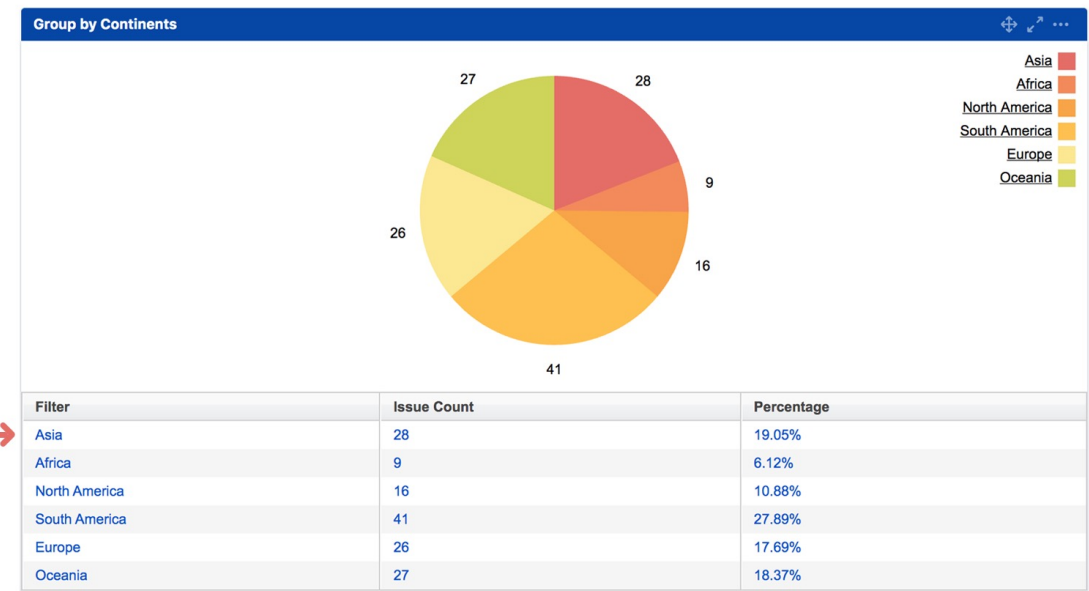

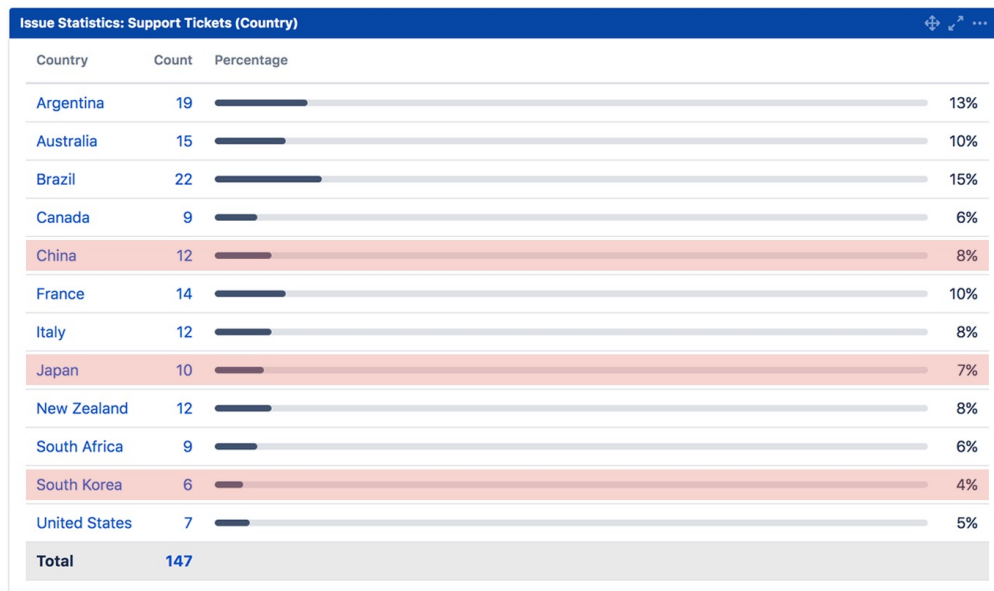

Use Case #7

The issue only has Country information, how do I group them into continents?

Multiple Filters Pie Chart Gadget

Tip: You can use different filters to report on a subsection (e.g. countries in Asia)

Reviews

Perfect gadget to visualize some more complex statistics.
Great support, they even implemented a new feature for us!

– *Stephan Strebl*

Nice simple graphic app, with very responsive support

– *Yann Follet*

Compatibility

The App also supports

- [Insight – Asset Management](#)
- [Jira Misc Custom Fields \(JMCF\)](#)

Additional Resources

- [Marketplace Listing](#)
- [User Guide](#)
- [Tips and Tricks](#)
- [Our Service Desk](#)

We welcome any feedback and suggestions for improvement 😊

Other Related Apps

Gauge Gadget is a collection of gadgets that allow users to see at one glance the issue count or number/time values of issues in a filter, and to see if it is reaching or has exceeded the given threshold.

Tissue provides a master view of related issues in a tabular format.
(e.g. Initiatives → Epics → Stories or Bugs → Support Tickets or Parent Issue → Subtasks or Requirements → Test Cases)

Three Dimensional Date Gadgets is a collection of gadgets that allow users to tabularise date related trends on the issues.
